Begin your studies!

When you’ve chosen your course, you are ready to begin your study. Use your User Name to log in, along with the Password you chose when you registered. **Cookies must be enabled on your browser for a successful login.** For example, on Microsoft Internet Explorer, any privacy setting set to “Medium” or lower should work fine (See menu Tools/Internet Options/Privacy).

Start with the Course Syllabus as the first step in your study. The Course Syllabus outlines the learning requirements for the course. Then, on the home page of each course, you will find instructions on how to navigate through a course. You will also find a complete index of all lessons in the course, allowing you to quickly jump to specific content. Start with the first lesson, and follow the Course Index through the course. Each course has a Course Discussion—a place to answer the questions in the course that are specifically designed to help you apply what you have learned and to also learn from other students enrolled in the course. It’s also a great idea to keep a notebook handy to keep a Course Journal while you’re studying the course.
